Understanding the Change

1 Why did Orlando Health refresh its strategic imperatives?

WHY NOW

Orlando Health has grown from a single hospital into a healthcare system serving communities across Florida, Alabama and Puerto Rico. The refreshed imperatives reflect who Orlando Health is today and where the organization is headed, while remaining true to the mission.

2 Why shift from six imperatives to four?

SIMPLER FRAMEWORK

Moving from six imperatives to four creates greater clarity, alignment and focus across a larger, more complex organization. The updates preserve the existing strategic direction while offering a more streamlined framework for goals, opportunities and mission advancement.

3 How were the refreshed imperatives developed?

BROAD INPUT

The imperatives were developed through the question: What does Orlando Health need to do over the next 10 years to fulfill its mission? Feedback from more than 1,500 leaders, team members, physicians and community partners informed the result.

4 How will the refreshed imperatives make Orlando Health a better place to work?

MEANING + OWNERSHIP

The imperatives reinforce a culture where team members feel valued, respected and empowered. Clear connections between responsibilities, organizational priorities and community impact can create greater meaning and ownership in the work.

5 How do the four imperatives work together to support the mission?

ONE MISSION

Together, the imperatives help Orlando Health deliver exceptional care, create an outstanding workplace and meet evolving community needs by focusing on excellence, physician partnership, people, growth and innovation.

ORLANDO HEALTH®

UNDERSTANDING THE EXPECTATIONS

Excellence and Quality

6 **“Demand” sounds harsh. Why use such a strong word?**

ACCOUNTABILITY

At Orlando Health, excellence is not optional. Patients and families expect excellent care, so leaders and team members hold themselves accountable to the highest standards in patient care, quality and economics.

7 **Does “Demand Excellence” mean team members must be perfect?**

NOT PERFECTION

No. It means giving our best each day, learning from challenges and working as a team to deliver on the mission. The expectation is continuous improvement, not perfection.

8 **What does “Demand Excellence” mean for the culture?**

SHARED STANDARD

The imperative strengthens a shared focus on quality, experiences and outcomes. It reinforces accountability, continuous improvement and shared ownership, recognizing that every team member contributes to excellence.

9 **Does this imply Orlando Health was not excellent before? How will excellence be measured?**

BUILDS ON STRENGTH

No. The imperative builds on decades of excellence and reinforces Orlando Health’s commitment to patients, families and communities. Measures should align with the new Quality definition and approved organizational metrics.

10 **What does “Drive Growth and Innovation” mean beyond expansion and technology?**

INNOVATION EVERYWHERE

Innovation can happen in any role or function. Improving a process to reduce patient wait times is innovation. Every team member can identify opportunities to improve how Orlando Health works and serves patients.

ORLANDO HEALTH®

MAKING THE CONNECTION

What It Means for Your Work

11 How does the new Quality definition apply to non-clinical roles?

EVERY ROLE CONTRIBUTES

Quality is the delivery of exceptional access, experience, safety and outcomes. Non-clinical roles contribute by improving processes, coordinating resources, maintaining safe environments and enabling patients and clinical teams to achieve strong experiences and outcomes.

12 What does "Partner with Physicians" mean for people who do not work directly with physicians?

SHARED RESPONSIBILITY

Physician partnership extends beyond clinical settings. Operations, technology, scheduling, finance, administration and other functions all influence physicians' ability to provide care. Every interaction is an opportunity to strengthen the partnership.

13 Does "Partner with Physicians" include advanced practice providers?

INCLUSIVE CARE TEAMS

The imperative distinctly names physicians because of their unique role in healthcare and in the patient and family experience. This does not diminish advanced practice providers, who remain essential members of the care team.

14 How will Orlando Health demonstrate that physician partnership is two-way?

LISTEN + INVOLVE

Orlando Health will continue listening to physician voices in clinical, strategic and operational decisions. Employed and independent physicians will continue to hold important formal and informal leadership roles.

15 How do the strategic imperatives differ from the Key Behaviors?

WHAT + HOW

The strategic imperatives define what Orlando Health prioritizes and how the organization fulfills its mission. The Key Behaviors define how people work together. Communication, Connection, Commitment and Curiosity bring the imperatives to life.

ORLANDO HEALTH®

USING THE FRAMEWORK

Putting the Imperatives into Practice

16 **How should I incorporate the imperatives into my daily work?**

DAILY DECISIONS

Use the imperatives to guide decisions and goals. Whether providing care, supporting operations, managing resources or leading others, every role can demand excellence, build partnerships, invest in people and identify improvements.

17 **Where can I learn more?**

RESOURCES

Additional information will be available through SWIFT, News Review communications and other organization-wide resources. Leaders will receive toolkits. Separate Talent Connection learning assignments are planned for leaders and team members.

18 **Will the imperatives affect reviews, coaching or recognition?**

PHASED INTEGRATION

The imperatives will be embedded in new hire orientation, online learning, CARE, coaching plans and recognition programs. Additional guidance will be provided before changes are incorporated into formal performance reviews.

19 **Will the imperatives be applied the same way everywhere?**

ONE FRAMEWORK, LOCAL CONTEXT

The imperatives provide one enterprise framework for mission, goals and opportunities. Communication may be tailored to local context. For example, the Alabama region's purpose statement, "Extending the healing ministry of Jesus Christ," will appear above the Orlando Health mission statement.

TALKING WITH YOUR TEAM

Leader Conversations and Accountability

20 **How should I incorporate the imperatives into team meetings?**

MAKE IT RELEVANT

Highlight one imperative at a time. Connect it to daily responsibilities, priorities and decisions. Share department-specific examples and invite team members to discuss how their work supports the imperative.

21 **How can I build team culture around the imperatives?**

CULTURE IN ACTION

Create an environment where people feel valued, respected and empowered. Use Communication, Connection, Commitment and Curiosity to guide interactions, strengthen teamwork and recognize contributions.

22 **How should I hold team members accountable?**

CLEAR + RESPECTFUL

Set clear expectations and explain how each role supports the imperatives and mission. Reinforce through regular conversations, coaching and examples. Recognize aligned actions and address improvement opportunities with transparency, consistency and respect.

23 **How should I communicate the refreshed imperatives?**

CONSISTENT MESSAGE

Start with why Orlando Health refreshed them, how they support the mission and how they guide goals and decisions. Use approved leader toolkits, focus on one imperative at a time, share relevant examples and direct team members to available learning resources.
